SUMMARY

Passionate about frontend technologies, in particular a strong interest in ReactJS and Vue.js ecosystems. I also enjoy UI/UX design and component-driven development with tools like StoryBook. Always happy to learn new technologies and play with code.

EXPERIENCE

Encored-Technologies, Seoul — *Software Developer*

07 2021 - 08 2021

Contributed frontend and UI enhancements, worked with project manager and designer to take wireframes from staging to production. Researched and quickly learned how to use DataTables and HighCharts.js APIs to fix minor bugs, errors, and complete Sprint requirements.

Dr English, Seoul — *Freelance Client*

08 2020

Lead a team of remote freelancers to redesign and rebrand a corporate website. Used collaboration tools Slack, Asana, and GitHub. I also trained junior developers on git, GitHub, HTML, CSS, Bootstrap, and JS so that they could quickly contribute to the project. Post-Project Eval: shorturl.at/byGJS

2500K, Indianapolis — *Web Developer intern*

01 2018 - 07 2018

While interning at an analytics company, I learned architecture (CodeIgniter, an MVC framework), tested API endpoints with Postman, and ran SQL queries.

EDUCATION

DePaul University, Chicago — *M.Ed. Secondary Education*

09 2009 - 07 2012

Indiana University Kelley School of Business, Indianapolis — *B.S. Computer Information Systems*

09 1997 - 09 2002

ORGANIZATIONS

FreeCodeCamp-Seoul — *Member since Spring 2020*

Active member of the Seoul chapter of [FreeCodeCamp.org](https://www.freecodecamp.org)
